### **DETAILED ACTION**

This Office Action is in response to Applicant's amendment filed 6-19-03. Claims 1 and 28 have been amended. Claims 12, 15, 17-27, and 29 have been canceled. Claims 1-11, 13, 14, 16, 28, and 30-33 are pending in this application.

The rejections under 35 U.S.C. 102, 103 and 112 which were set forth in the Office Action mailed 12-19-03 have been overcome with Applicant's amendments. The objection to claim 1 for missing the definition of R14 has been overcome with Applicant's amendments.

The objection to claims for containing non-elected subject matter has been maintained.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The above claims are directed to a 2-decarboxy-2-phosphinico prostaglandin derivative wherein R2 is a "mono- or polyvalent inorganic cation and a mono- or polyvalent organic cation". The terms "mono- or polyvalent inorganic cation" and "mono- or polyvalent organic cation" lack description in the specification. The terms

“mono- or polyvalent inorganic cation” and “mono- or polyvalent organic cation” are broad. Applicant does not define the term “mono- or polyvalent inorganic cation” and “mono- or polyvalent organic cation” nor does Applicant give examples which are recognized in the art as representative of the “mono- or polyvalent inorganic cation” and “mono- or polyvalent organic cation” instantly claimed. There is no data or correlative prior art evidence which supports Applicant’s claim that at the time of filing they were in possession of compounds containing said “mono- or polyvalent inorganic cation” and “mono- or polyvalent organic cation” as asserted in the claims. There is no evidence of record to guide one of ordinary skill in the art in preparing compounds containing a “mono- or polyvalent inorganic cation” or a “mono- or polyvalent organic cation”.

### ***Claim Objections***

Claims 2-11, 13, 14, 16, 28, 30, 31, 32, and 33 are objected to because of the following informalities:

Claims 2-11, 13, 14, 16, 28, 30, 31, 32, and 33 are objected to because they depend from claim 1, which is rejected.

Claim 11 is objected to because it appears that the last word of the claim, “position” was typed in error. It is suggested that Applicant delete the last word of claim 11, “position”.

Claims 30, 31, 32, and 33 contain 2-decarboxy-2-phosphinico prostaglandin derivatives which are drawn to non-elected subject matter. It is requested that Applicant

limit the 2-decarboxy-2-phosphinico prostaglandin derivatives in claims 30, 31, 32, and 33 to those that are in claim 1. Appropriate correction is required.

Claims 34-50 have been withdrawn from consideration because they are drawn to non-elected subject matter. It is suggested that Applicant cancel claims 34-50.
